The NetSuite Engineering Evolution

Deep Platform Expertise & SDLC Modernization

**Traditional
NetSuite**

SDF

TypeScript

**Scalable
Architecture**

- ✓ **10+ Years NetSuite Engineering**
- ✓ **Retail & Manufacturing Domain Experience**
- ✓ **SuiteCloud Development Framework (SP)
Architech**
- ✓ **TypeScript-Driven Modernization
Advocate**

High-Impact Enterprise Experience

Proven Cross-Functional Leadership

Current: Senior NetSuite Developer

(Seattle-based retail organization)

Led full **SDLC** modernization & architectural transformation

Enterprise Impact:

- ✓ Reduced Total Cost of Ownership (TCO)
- ✓ Architected complex 3PL integrations
- ✓ Delivered high-impact automations
- ✓ Modernized deployment reliability via SDF

Past Success:

- ✓ 500% NetSuite order processing performance increase
- ✓ E-commerce rearchitecture enabling scalable subscription growth
- ✓ Core O2C stabilization and integration overhaul

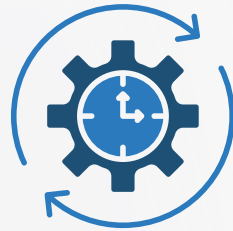

Technical Mastery

Engineering Rigor Inside NetSuite

Core Stack

- SuiteScript 2.x
- TypeScript
- SuiteCloud Development Framework (SDF)
- Git-Based Version Control

Integration & Platform

- Celigo
- EDI Enhancements
- FTP Solutions
- Magento Integrations
- 3PL & TMS Platforms

Architecture Strength

- SDLC Governance
- Code Quality & Linting Standards
- Deployment Reliability Engineering
- Cross-Functional Finance & Supply Chain Alignment

Strategic Value Proposition

Engineering Leadership for Modern NetSuite Environments

Business–Technology Alignment

Enterprise-grade scalable architecture

Operational Efficiency

Automation reducing manual reconciliation
& order errors

Modern Development Standards

TypeScript + Structured SDLC modernization

Integration Expertise

Complex third-party ecosystem engineering
